FOR IMMEDIATE RELEASE

**Mueller Sports Medicine Helps Clean-Up H1N1 Flu Virus
*Cleaner & Disinfectant Effective Against "Swine" Flu Strain***

Prairie du Sac, WI-- As media attention surrounding H1N1 escalates, a Wisconsin sports medicine company has the solution to help stop the spread of the deadly virus.

Mueller Sports Medicine, perhaps better known for its Quench® Gum and the black No-Glare® strips worn by football players, has been manufacturing Whizzer® Cleaner & Disinfectant for over 40 years. Whizzer®, a concentrated cleaner and disinfectant, is effective against the 2009 H1N1 flu on hard non-porous surfaces.

The recent global outbreak of H1N1 has highlighted the importance of proper hygiene, including the cleaning and disinfecting of surfaces. The EPA has recently noted that those products currently registered for use against influenza A viruses will be effective on 2009 H1N1 flu strain as well as other influenza A strain virus strains on hard non-porous surfaces.

Whizzer®, which also kills Antibiotic-resistant MRSA (MRSA refers to Methicillin-Resistant Staphylococcus aureus), HIV-1, Hepatitis B & C and fungus germs on contact, is recommended for use on door knobs, walls, workout equipment, training tables and any hard surface that may come into contact with the bacteria.

As always, for safe and effective use of these products, carefully follow all label instructions. Remember that your first line of defense, per CDC guidelines, is the frequent washing of hands with soap and water. Hard surface disinfectant products like Whizzer® are not for use on the skin.
